03 SECTION

The problem

Brokers live on commission, and wait months for it

01 No loan facility against the commission they are owed

02 No salary: they live from one commission to the next

03 Less motivation to sell more while earlier commissions are unpaid

04 Trust is missing

Brokerages cannot plan around late, uncertain payments

01 Cash flow gaps limit campaigns, marketing and the day-to-day running of the business

02 Late payments put their best brokers at risk of leaving, as brokers assume the brokerage is not paying or not effective

03 Revenue and growth numbers are unpredictable

04 Managing a business on cash predictions is not a business

Late payments cost developers reputation and sales

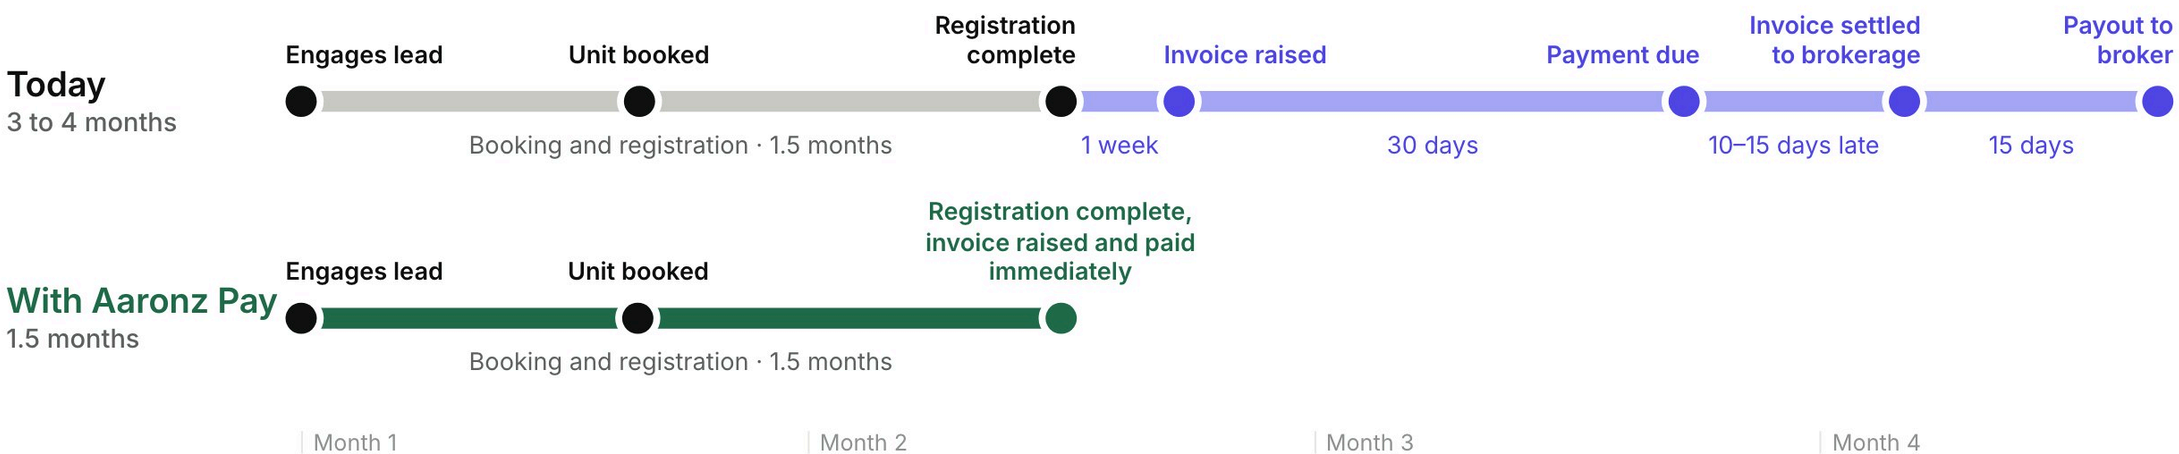

01	Paying brokers late damages their reputation
02	Slow payments slow the sales cycle, as brokers lose motivation
03	Invoicing is manual, with no digital view of who is owed what, and when
04	No risk partner or fin-real-tech solution is available to take on this challenge
