Aaronz AI

Real estate commissions, paid the same day.

A brief for Reem: how big the market is, the problem it has, and how we solve it.

01 THE MARKET · DUBAI 2020 TO 2025

Dubai property sales grew close to 10× in five years

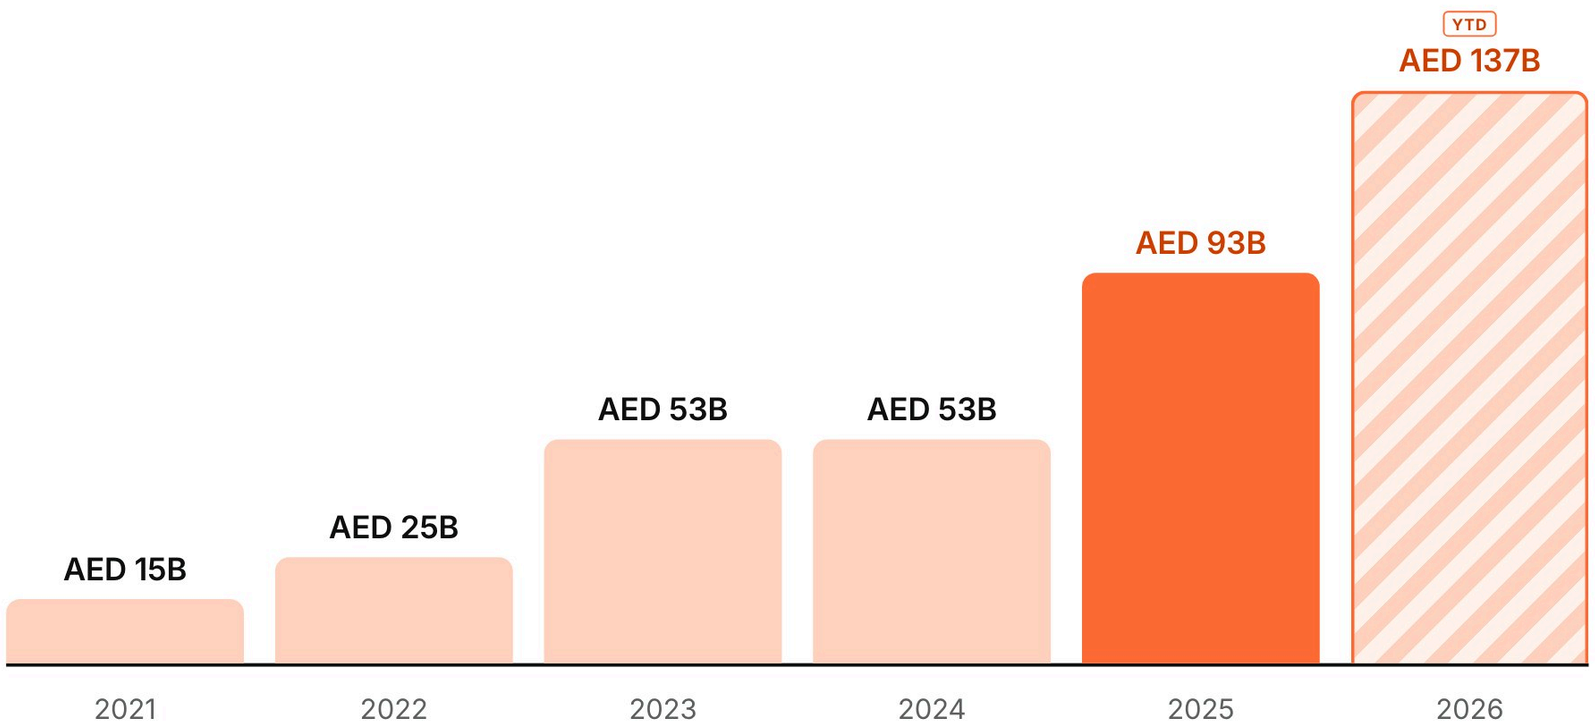

AED 680B
sold in 2025

217,889
sales in 2025, up from 34,947 in 2020

63%
of 2025 sales were off-plan

Dubai Land Department sales value. 2020: Annual Report 2020; 2023: Annual Report 2024; 2024 and 2025: Annual Data Review 2025.
Estimated: 2021 and 2022 add up every sales registration in DLD transaction data. The same method is within 0.5% of DLD's reported totals for 2023 to 2025.

Abu Dhabi property sales grew 6× in four years

AED 93B
sold in 2025, a record

AED 137B
sold in 2026 so far, to 9 November

78%
of 2025 home sales value was off-plan

ADREC real estate sales value. 2021 to 2025: 2025 Abu Dhabi Real Estate Report. 2020 is left out: ADREC notes it was inflated by registration incentives.
YTD: 2026 to 9 November, added up from ADREC sales records, which match ADREC's reported totals within 3% for 2022 to 2025 and its H1 2026 figure of AED 86B.

02 THE PROBLEM · DEVELOPERS

Every sale leaves developers a commission bill to pay

Paying every broker on time strains their cash flow, so they would rather pay later.

Developer pays commission to — **Brokerage** pays a share to — **Broker**

WHAT DEVELOPERS WANT

A partner who pays brokers now, while the developer pays later

HARDEST HIT

Smaller developers

They can't raise funds the way large developers can, so commission comes straight out of the project's cash.

02 THE PROBLEM · BROKERAGES

Brokerages can't plan around money with no date

They don't know when the commission will land, and only the biggest can push a developer to pay.

Developer pays commission to — **Brokerage** pays a share to — **Broker**

	LARGE BROKERAGE	SMALL BROKERAGE
Knows when the money lands	No	No
Can push the developer to pay	**Yes**	No
What happens	Plans around the delay	**Many don't survive**

Every brokerage wants the money sooner, to spend on the campaigns that sell developers' projects.

02 THE PROBLEM · BROKERS

A broker works five months for one paycheck

The deal takes about two months to close. The commission comes two to three months after that.

Bills don't wait

Rent and bills are due every month while the commission is pending.

Stuck where they are

A broker can't move agency or leave until the commission is paid.

Indicative timeline.

02 THE PROBLEM · THE GAP

Commission is earned at the sale, and paid months later

Nobody in the chain wants to carry that gap.

DEVELOPER

Wants to pay later

BROKERAGE

Needs to be paid now

BROKER

Needs to be paid now

Someone has to fund that gap, against the developer's promise to pay.

03 THE SOLUTION

A finance partner pays the brokerage the same day

Aaronz is the software. The partner approves each invoice, pays from its own account, and the developer repays the partner.

Same day — 30 to 45 days

Developer confirms the commission
The buyer milestone is met.

The partner pays the brokerage
Its own credit decision, from its own account.

The developer repays the partner
The full invoice, on its usual dates.

BROKERAGE · PAYS 18% A YEAR

Paid early

AED 97,780.82

On an AED 100,000 invoice repaid in 45 days.

FINANCE PARTNER · EARNS 12% A YEAR

Keeps its return

AED 1,479.45

After Aaronz's fee, on the same invoice.

AARONZ · 6% A YEAR

A fee, invoiced to the partner

AED 739.73

Plus VAT, once the developer has repaid.

Worked example: AED 100,000 invoice, repaid after 45 days. Rates are a year on the invoice amount for the days funded (actual/365). The money never passes through Aaronz's bank.
