Aaronz AI

Real estate commissions, paid the same day. Autonomously, by AI.

Aaronz handles broker commission payments for developers. Each brokerage chooses when to be paid, and is paid exactly on that day.

01 WHO IS BUILDING IT

The team

Surandar Jesrani

Jikku Luke

Bharath Chippa

02 THE PROBLEM

Brokerages wait months to receive their commission

The commission is earned, but the money is still months away, and both sides pay for it.

Commission milestone achieved
The booking is done.

4 to 5 days

“Now you can raise an invoice”
Only after the developer has processed it.

30 to 90 days

Money in the bank
The brokerage waits for payment.

BROKERAGES

Can't plan or grow

Salaries and rent are due every month, but no one knows when the commission will land.

AGENTS

Stuck with pending commission

Agents who want to change agency can't move freely while their commission is still pending.

DEVELOPERS

Carry the admin, lose broker attention

Finance teams process every invoice and field the chasing. Brokerages may push projects from developers who pay faster.

THE RISK

Commission isn't safe until it's paid

Until the money lands, the brokerage carries the risk of delays, disputes or a developer that can't pay.

Indicative timeline.

03 THE SOLUTION

We pay them the same day

Aaronz pays the commission, and the developer still pays on its usual dates. Brokerages can also choose a later date.

Immediately

Commission milestone achieved

The booking is done.

“Now you can withdraw”

Aaronz notifies the brokerage straight away.

Same day

Money withdrawn

Invoice raised, money withdrawn that day.

BROKERAGES

Can plan and grow

They know the exact day the money arrives, so salaries and rent are covered on time.

AGENTS

Free to move

Commission is paid the same day, so nothing pending ties an agent to their agency.

DEVELOPERS

Less admin, more broker attention

Aaronz handles the invoices and the chasing. Brokers paid the same day have a reason to push their projects.

THE RISK

Money in the bank the same day

Once paid, the brokerage no longer waits on the developer. Aaronz collects later, only from developers it has tested.

Proposed timeline. Settled the same day if the invoice is raised before 2 pm; after that, the next working day.

04 THE MARKET · DUBAI 2025

Dubai's commission market: $3.7B and growing fast

$185.8B	62.6%	$3.7B	+31%
property sales, 214,912 deals	of deals were off-plan	brokerage commissions paid	commission growth vs 2024

START · OFF-PLAN

Commission paid by developers

Off-plan sales	**$79.8B**
Off-plan deals	**134,623**

LATER · SECONDARY

Commission on ready homes

Ready-property deals	**About 80,300**
Broker commission	**Usually 2%, paid by buyer or seller**

Dubai Land Department: commissions and growth, 9 March 2026; 2025 sales and off-plan deals as reported from DLD data by Bayut and Truhauz. 2% is the usual secondary-market rate.

05 WHAT WE ARE BUILDING

A product, not a service

We are building a product that manages all of this on its own, instead of hiring an army of accountants. Our goal is full autonomy, as an AI-native company from the ground up.

BROKERAGES

Payouts that run themselves

Milestone reached, brokerage notified, date chosen, money paid, with no one processing it by hand.

INVOICES

Invoices verified by AI

Every invoice is checked as authentic before a payment goes out, with no manual queue.

DEVELOPERS

Developers tested by AI

Internal tools test each developer's record and tell us whether to fund or partner.

Zero bloat in the AI economy.

06 THE BUSINESS MODEL

How we make money

We borrow from finance partners at a lower rate, and lend to brokerages at a higher one. We keep the spread.

DEVELOPER PAYS IN	BROKERAGE PAYS US	WE PAY THE PARTNER	OUR SPREAD
30 days	$313	$188	$125
60 days	$625	$375	$250
90 days	$938	$563	$375

EXAMPLE · $25,000, DEVELOPER PAYS IN 60 DAYS

We charge	**15% a year**
We get money at	**9% a year**
Brokerage pays us	**$625**
We pay the partner	**$375**
Our spread	**$250**

Illustrative, on a same-day payout of $25,000. Interest is the commission × the annual rate × days until the developer pays ÷ 360. Before VAT, operating costs and credit losses. Taking a 50% payment uses half the fee.

07 THE NEXT PRODUCT

Agents cash out their commission early

The LytePay model from Singapore, built for the UAE. The agent cashes out against incoming commissions, and the brokerage repays us when the commission lands.

$10,000 CASH-OUT, LANDS IN	AGENT PAYS US	WE PAY THE PARTNER	OUR SPREAD
30 days	$450	$75	$375
60 days	$450	$150	$300
90 days	$450	$225	$225

IF 5% OF AGENT COMMISSION CASHES OUT

Agents earn a year	**$1.85B**
Cashed out, at 80%	**$74M**
Fees, less partner cost	**$3.3M less $1.1M**
Capital needed	**$12.3M**
Our spread a year	**$2.2M**

IN THE UAE

ACOT

Agents can apply. Up to 90%, with a 3% fee in its example. The brokerage co-signs, and ACOT collects from the developer.

IN THE UAE

Agents First

Keeps about 15% of the commission and pays in 24 to 48 hours. How it collects isn't published.

IN THE UAE

Insiders of Dubai

Advances within 7 days of the SPA for agents on its platform. Fee not published.

THE GAP

Repaid by the brokerage

We found no UAE player publishing the LytePay setup: a live commission balance, repaid by the brokerage.

Illustrative. 4.5% flat fee and 80% limit are LytePay's published Singapore terms. 9% cost of money, 60 days and 5% take-up are assumptions. $3.7B commissions: DLD; 50% agent share: Bayut. Before VAT, operating costs and credit losses.

08 WHO WE PARTNER WITH

Every developer tested before we sign

We start with reputed developers that hold a large share of the market. Our internal tools then test each one on five things.

WILL WE GET PAID?

Reputation

Well regarded by brokers and buyers.

Cash flow

Strong finances and manageable debt.

Payment record

A proven history of paying dues on time.

IS THE VOLUME THERE?

Market share

A large share of sales in the market.

Unsold inventory

Stock still to sell, so the volume keeps coming.

If they don't pass all five, we don't sign.

09 WHO ELSE IS DOING THIS

Competition

GLOBAL · SINGAPORE

Lyte

$33M

valuation

Advances commissions to property agents, and raised $4.2M in February 2026. $9M raised in total.

GLOBAL · UNITED STATES

Tongo

$11M

raised · valuation not disclosed

A commission line of credit for agents, on a card, backed by MetaProp. No broker sign-off needed.

LOCAL · UAE

FastPay RECAP

Valuation not disclosed

Paid 2 to 9 days after developer approval. A technology platform, funded by a licensed partner.

LOCAL · UAE

ACOT

Valuation not disclosed

Same day before 2 pm for top developers. Advances up to 90% of the commission, for a flat fee.

Lyte: valuation from Dealroom, funding from CB Insights. Tongo: FinLedger, September 2022. FastPay and ACOT: their own websites, November 2026. All are private companies, so figures may be out of date.

A funding partner lets us keep 95%

Mawarid Finance would provide the licence and the capital, so we only raise equity for the product.

ADVANCES A YEAR: $74M | $150M | **$300M**

PARTNER'S RATE: 7% | **9%** | 11%

OUR FEE: **15%** | 18%

SIMULATION	EQUITY ONLY	OUR OWN DEBT	MAWARID FUNDS IT
Equity we raise	$51M	$6M	**$1M**
Debt or partner funding	None	$45M	**$50M**
Founders keep	28.2%	76.9%	**95.2%**
Cost of funds a year	None	$4.05M	**$4.50M**
Profit a year	$4.75M	$0.70M	**$0.25M**
Founders' share of profit	$1.34M	$0.54M	**$0.24M**

Best case for dilution: founders keep 95.2%, and partner funding covers $1M of costs at $133.3M of advances a year.

Illustrative. Mawarid's terms aren't final, and its rate is an assumption. Also assumes pre-money valuation of $20M, $1M to build the product, yearly costs of $1M to $2M, 60 days to repayment, 0.25% losses carried by us, and a 10% cushion on our own debt. Before VAT.
